

Name \_\_\_\_\_ Homework for: Sep. 4-7 Due: Friday, Sep. 7 \_\_\_#

TEKS: 3.5A

1. Luke made a pictograph that shows vegetable plants he planted in the neighborhood garden.

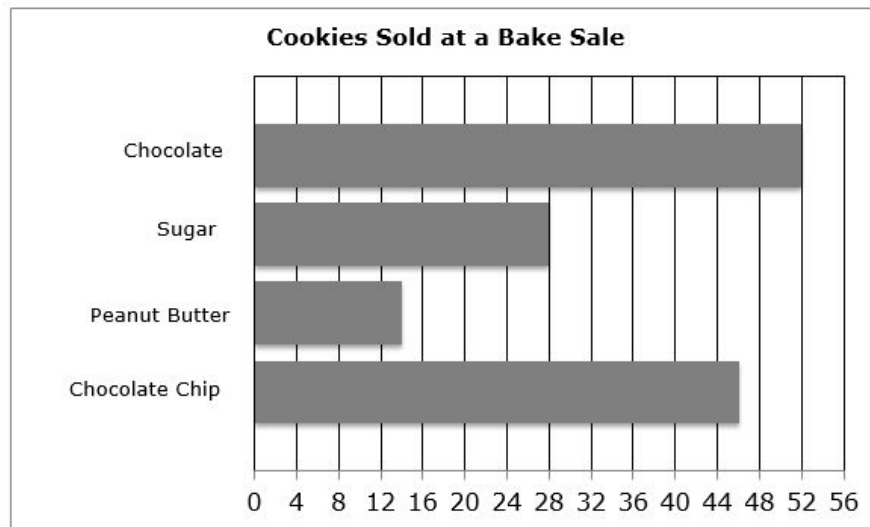

Each  represents 6 plants.

Write and solve an equation that shows how many plants Luke planted in the garden.

TEKS: 3.5A

2. The graph below shows the number of different kinds of cookies Khloe sold at a bake sale.

Which equation can be used to find the total number of cookies Khloe sold at the bake sale?

- A.  $52 + 28 + 14 + 46 = 140$
- B.  $52 + 28 + 13 + 45 = 138$
- C.  $50 + 28 + 15 + 46 = 149$
- D.  $50 + 28 + 15 + 46 = 139$

TEKS: 3.8B

3. The pictograph shows how many minutes Heath spent practicing his violin each day this week.

How much more time did Heath practice on Friday than Thursday?

TEKS: 3.8B

4. A children's clothing store sells belts. The belts can be purchased in 5 different lengths. The dot plot shows the numbers of each belt length the store sold in 1 week.

What was the total number of belts sold that were longer than 22 inches?
